Sajil Lidhan

Java Backend Engineer | Spring Boot | Microservices

Dubai, UAE | +91 8848089010 | sajillidhan.thayyil@gmail.com | Nationality: Indian

LinkedIn | Portfolio

Professional Summary

Java Backend Engineer with 4+ years of experience building enterprise backend systems for the telecom industry. Worked on a large-scale marketing campaign and rule-execution platform used by telecom operators, built with Java, Spring Boot, Microservices, Apache Kafka, and Oracle/MySQL, and deployed on Docker and Kubernetes. Built automated SQL generation and ETL workflows that reduced manual effort and improved processing speed. Use AI coding assistants for code review, debugging, and faster development.

Skills

Programming Languages:	Java (8, 11, 17), Python, SQL
Backend Technologies:	Spring Boot, Spring Data JPA, Hibernate, REST APIs, OpenFeign
Messaging & Streaming:	Apache Kafka, Event-Driven Architecture
Databases & Caching:	Oracle, MySQL, Hive, HBase, Redis (Redisson)
Cloud & DevOps:	Docker, Kubernetes, AWS (Lex, DynamoDB), CI/CD
Data Engineering & Automation:	ETL, Pentaho, Workflow Automation, n8n
Testing & Quality:	JUnit, Mockito, SonarQube
AI Tools:	Claude (AI-Assisted Development), Prompt Engineering, NLP
Developer Tools:	Git, Maven, Postman, Jira, Linux
Architecture:	Microservices, Distributed Systems, Performance Optimization

Experience

Software Engineer

6D Technologies | Bengaluru, India

August 2022 – January 2027

- Developed backend services for a telecom marketing campaign and rule-execution platform using Java, Spring Boot, Microservices, REST APIs, and Spring Data JPA/Hibernate
- Built rule-engine features that convert business rules created in the UI into SQL queries and Pentaho ETL pipelines, using Redis (Redisson) caching to speed up processing and reduce manual effort
- Designed configurable JSON and JSON-to-XML transformation frameworks that map subscriber profile data across Oracle, MySQL, Hive, and HBase
- Integrated external promotion and rewards platforms using REST APIs, OpenFeign, and Apache Kafka event streams
- Developed Python-based customer segmentation scripts for large-scale data processing
- Wrote unit tests with JUnit and Mockito and maintained code quality standards using SonarQube
- Supported containerization and CI/CD deployments using Docker and Kubernetes
- Worked with business analysts, product managers, QA teams, and client stakeholders from requirements through production support

Key Projects

Natural Language to SQL Analytics Assistant

GitHub Repository

Built an analytics assistant that turns plain-English questions into SQL queries and returns the results as chat replies, charts, and tables.

- Built a text-to-SQL workflow that uses a large language model (LLM) through the Groq API to convert user questions into executable database queries, letting non-technical users get data without writing SQL
- Integrated Telegram and n8n workflows for conversational analytics and automated query execution
- Displayed query results as chat responses, charts, and tabular reports

Technologies: Python, SQL, Groq API (LLM), n8n, Telegram Bot API, NLP, Data Visualization

Conversational Chatbot Assistant

GitHub Repository

Built a cross-platform mobile chatbot using Amazon Lex and React Native that lets users complete tasks through natural-language conversations.

- Designed intent-based conversation flows in Amazon Lex to automate common user requests
- Integrated Amazon DynamoDB and backend services to store user sessions, interaction history, and chatbot data
- Built the React Native mobile app for real-time chat on Android and iOS

Technologies: React Native, Amazon Lex, AWS, DynamoDB, REST APIs

Certifications

Generative AI Fundamentals – Microsoft (2026)

Education

Master of Computer Applications (MCA) – Attested *January 2022*
APJ Abdul Kalam Technological University, Kerala, India

Bachelor of Computer Applications (BCA) – Attested *March 2019*
University of Calicut, Kerala, India

Languages

English, Hindi
