Sajil Lidhan

Java Backend Engineer | Spring Boot | Microservices

Dubai, UAE | +91 8848089010 | sajillidhan.thayyil@gmail.com | Nationality: Indian

LinkedIn | Portfolio

Professional Summary

Java Backend Engineer with 4+ years of experience developing enterprise backend systems in the telecom industry. Experienced in building marketing campaign management and business rule execution platforms using Java, Spring Boot, Microservices, Apache Kafka, Oracle, and MySQL, with deployments using Docker and Kubernetes. Skilled in Python scripting, automated SQL generation, and ETL workflows to improve processing efficiency and reduce manual effort. Experienced in using AI coding assistants to support debugging, code review, and development productivity.

Skills

Programming Languages:	Java (8, 11, 17), Python, SQL
Backend Technologies:	Spring Boot, Spring Data JPA, Hibernate, REST APIs, OpenFeign
Messaging & Streaming:	Apache Kafka, Event-Driven Architecture
Databases & Caching:	Oracle, MySQL, Hive, HBase, Redis, Redisson
Cloud & DevOps:	Docker, Kubernetes, AWS, CI/CD
Data Engineering & Automation:	ETL, Pentaho, Workflow Automation, n8n
Testing & Code Quality:	JUnit, Mockito, SonarQube
AI & Development Tools:	LLM API Integration, Prompt Engineering, NLP
Developer Tools:	Git, Maven, Postman, Jira, Linux
Architecture & Performance:	Distributed Systems, Performance Optimization

Experience

Software Engineer

6D Technologies | Bengaluru, India

August 2022 – January 2027

- Developed backend services for a telecom marketing campaign management and business rule execution platform using Java, Spring Boot, Microservices, REST APIs, Spring Data JPA, and Hibernate.
- Developed rule-engine features that translate business rules configured through the UI into SQL queries and Pentaho ETL pipelines, leveraging Redis (Redisson) caching to improve processing efficiency and reduce manual effort.
- Designed configurable JSON and JSON-to-XML transformation frameworks to map subscriber profile data across Oracle, MySQL, Hive, and HBase.
- Integrated external promotion and rewards platforms using REST APIs, OpenFeign, and Apache Kafka event streams.
- Developed Python scripts for customer segmentation and large-scale data processing.
- Wrote unit tests using JUnit and Mockito and maintained code quality standards using SonarQube.
- Supported application containerization and CI/CD deployments using Docker and Kubernetes.
- Collaborated with business analysts, product managers, QA teams, and client stakeholders throughout requirements analysis, development, testing, deployment, and production support.

Key Projects

Natural Language to SQL Analytics Assistant — 2025

GitHub Repository

Developed an analytics assistant that converts natural-language questions into SQL queries and presents results through conversational responses, charts, and tables.

- Built a text-to-SQL workflow using an LLM through the Groq API to convert user questions into executable SQL queries, enabling non-technical users to retrieve data without writing SQL manually.
- Integrated Telegram and n8n workflows to support conversational analytics and automated query execution.
- Presented query results through chat responses, charts, and tabular reports.
- **Technologies:** Python, SQL, Groq API (LLM), n8n, Telegram Bot API, NLP, Data Visualization

Conversational Chatbot Assistant — 2022

GitHub Repository

Developed a cross-platform mobile chatbot using Amazon Lex and React Native, enabling users to interact with chatbot workflows through natural-language conversations.

- Designed intent-based conversation flows in Amazon Lex to automate common user requests.
- Integrated Amazon Lex with the React Native application to enable natural-language chatbot interactions.
- Developed the mobile application interface to support chatbot interactions on Android and iOS
- **Technologies:** React Native, Amazon Lex, AWS

Certifications

Generative AI Fundamentals – Microsoft (2026)

Education

Master of Computer Applications (MCA)

APJ Abdul Kalam Technological University, Kerala, India | January 2022
Degree certificate attested

Bachelor of Computer Applications (BCA)

University of Calicut, Kerala, India | March 2019
Degree certificate attested

Languages

English, Arabic , Hindi
